

How to install the pump of the Domino A120 inkjet printer and replace the level sensor?

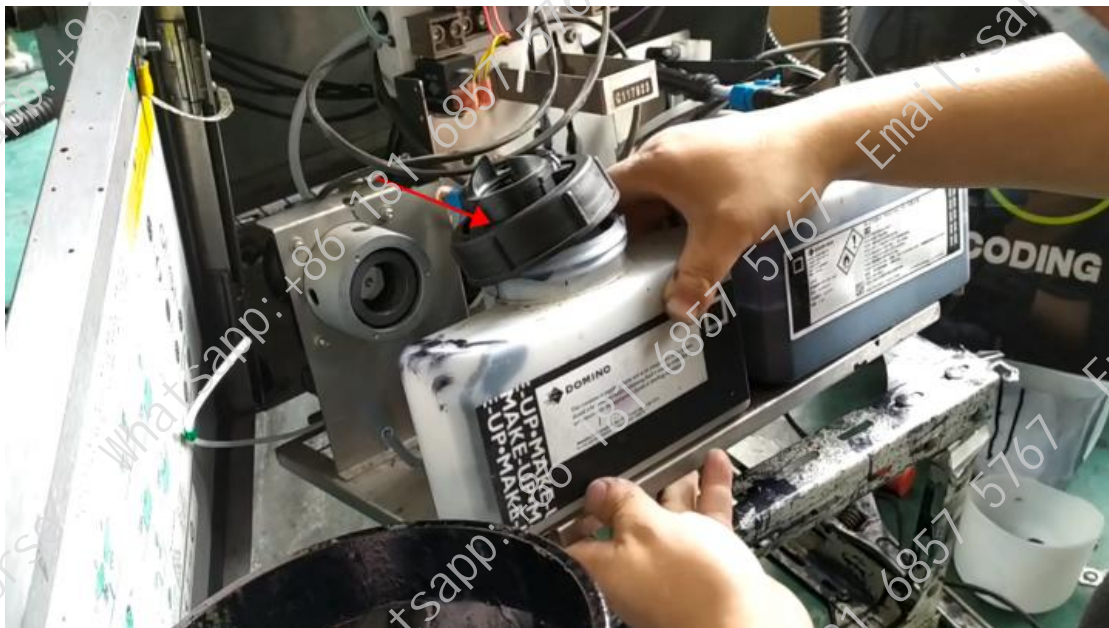

Just blow from above and there will be cleaning fluid down below it, indicating that the pump is clear:

Then install the pump, and then install the fixing screws, the pump is installed:

Let's take the lid off the solvent bottle:

Loosen the screws below:

Take the bottle off:

Then unscrew the solvent level sensor:

If you replace it, find a new one and install it like this:

The same is true for ink level sensor.
