

Product Name	tij printer
Specification	4.3 inch touch screen Cartridge size 42ml: 93mm*70mm*19mm Nozzle 42ml: 19mm*19mm
Resolution	300DPI*2
Counters	Series No, Carton No, Pallet No etc
Printable heights(mm)	2-12.7mm
Printing speed	0-60 m/min
Production speed	Production speed can be set as request, automatic calculation and external synchronizer
Barcode	QR CODE、PDF417、DATAMATRIX、UPCA、UPCE、EAN13、EAN8、INT25、CODE39、CODE128、EAN128
Date format	Production date, expiry date with several formats for option
Print content	Text/Picture/Serial Number/Bar Code/QR Code/GS1 DataMatrix/Variable Traceability Code/Dynamic Database
Resolution	300DPI*2
Ink management	Identify ink type automatically and recommend the best printing parameter Original authentic HP ink cartridge guaranteed Automatic measuring system for ink consumption
Installation	Standard side printing bracket, down printing bracket and anti-shock, users can install according to their needs, spring mechanism is optional
Power supply	100 ~ 240V AC input, 16.8V/2A DC output

Q1: What is a TIJ machine?

A: TIJ uses thermal foaming technology, which is similar to that of office printers. Printing is clear, simple and convenient.

Different from the CIJ small character inkjet printer, it is simple and convenient to operate, and the defect is that the product needs to be very close to the surface of the object.

Unlike CIJ small character inkjet printers, the nozzle can be far away from the product surface.

Q2: What consumables does the TIJ printer use?

A: TIJ's coding machine only needs ink cartridges, no solvents. Save more consumables.

Q3. What are the types of TIJ machines?

A: TIJ's machines can be divided into online and handheld. In online, the nozzle does not move, and the product is printed in a flowing state.

The handheld TIJ machine does not move the product, the machine is moving, hold it in the hand for printing.

Q4. In what colors are the ink cartridges of TIJ machines?

A: There are black, white, red, blue, yellow, etc., black is commonly used, and black has the lowest cost.

Q5. What are the types of ink cartridges for TIJ machines?

A: There are two types of ink cartridges: water-based and dry. The type of ink cartridge is mainly determined by the nature of the surface of the printed object. For example, for printing on paper, you can use water-based ink cartridges, and use dry ones for plastic surfaces. Ink cartridges, dry ink cartridges are conventionally used. Dry ink cartridges mean quick drying time, and the cost is slightly higher than that of water-based ink cartridges.

Q6. Which applications can be printed with TIJ machines?

A: Normally flat objects, and printing where the print head is close to the surface of the object, can use TIJ machines.

Q7. How to contact us?

A: You could email us (sales@cheef.cn), wechat/whatsapp/Tel.: +86-181-6857-5767 or send us inquiry through below.
