

Standard features: 3-line coding, USB Message Sharing and storage of up to 1000 messages

Increase printing speed

Linx insight? Is added, which can be used to realize remote monitoring and control of inkjet printer through smart phone or PC

Add quickswitch? For quick and accurate code changes using a barcode scanner

Increase your line integration by adding parallel I / O and Ethernet connections.

Keep costs low

Predictable maintenance schedule with service intervals up to 6000 hours

Very few parts need to be replaced during service and minimum nozzle maintenance

Large color user interface with prompt code field can realize quick editing and message creation

Reduce the errors and downtime of surefill? System to prevent misinjection

Keep the production line running

IP55 stainless steel shell, and reliable operation in no door open flush environment

Fullflush self-cleaning technology keeps the nozzle clean, so it can start reliably even after a long shutdown.

No need to adjust the nozzle, can achieve reliable and consistent spray printing
